I broke down and got a shortwave radio that picks it up.
Listened to 1500 last night,had a coworker call saying they were talking about Nibiru last week and I couldn't listen.
Had to get a radio thats gets down to 3.215 on sw.
I might be able to hear what other countries think of our great country.

I bought another shortwave radio, C Crane radio
Can't wait to try it out again in the morning
I get KVSC 88.1 and 101.7 out of St.Cloud, on the AM side 770,950,1500.
Wish I would have bought this radio years ago.

First I got a message under 50kb ,then under 500 pixel now, You are only allowed to upload files of type:\n zip,txt,doc,gz
*it was a jpeg of the radio
Your file has not been uploaded. Try posting again or editing the post
